Company Values

- We always act with integrity in all relationships with people and with institutions.
- We only do our best work for our customers, acting always in their best interests.
- We recognise we cannot do our best work unless we behave as a team, each person's performance being interdependent on the performance of others.
- We pay attention to detail. We go the extra mile. We are helpful to others, purposeful in what we do, and always complete our tasks in full and on time.
- We always honour our commitments both to our fellow staff members and to our customers.
- We work in a systemised environment, always using proven methodology and we never cut corners.
- We keep the overall profitability and financial stability of the business in the forefront of our minds.
- We promote and reward loyalty, honesty & obedience within our workplace.
- We help our community.

Company Mission

- To provide total solutions to meet our customers building envelope requirements
- To deliver quality on time every time
- To stand by our word with integrity

Company Vision

- Our customers must regard us as being passionate about providing the most sustainable, innovative and dependable exterior architectural solutions in our nation.

Our Specifiers

Louvreclad work along side leading architects and designers to deliver your vision from initial concept through to completion.

Our Clients

Louvreclad work with nationally renown builders who meet our stringent quality standards and strive to perform to the same high standards and values as ours.

Project

One One One Eagle Street

Location

111 Eagle Street - Brisbane, QLD

Builder

Leighton Contractors

Product

Altura Series®

Finishes

Interpon D2010 Sable® Black powder coated aluminium

Architect

Cox Rayner

Brief

Louvreclad worked with the project's architect over a six month period to meet the parameters of Council requirements while delivering the original design.

The Altura Series® louvre cladding surrounding the building's rooftop plant equipment was required to include 80 per cent open space with zero vision.

Louvreclad developed a simple but sophisticated solution using 100 lineal metres of 10 metre high cladding, and managed the project seamlessly from design through to installation.

**Project**

Motorama Toyota

Location

1060 Ipswich Road - Moorooka, QLD

Builder

Rohrig

Architect

W.I.M Architects

Product

Polaris Series®

Finishes

Dulux Duratec X15® Zeus Talc powder coated aluminium

Dulux Duratec X15® Zeus Timberland powder coated aluminium

Brief

This project exemplifies bringing a stunning design concept to life where the whole building façade was designed, manufactured and installed to resemble the Toyota logo. The logistics of installation were also a challenge with every single panel numbered to ensure on-site installation went as smoothly and efficiently as possible.

Although the initial concept of an embossed finish wasn't achievable, Louvreclad was able to achieve the exact likeness with the Polaris Series® perforated metal panels.

Custom perforations allow for complete design control & the result was a high impact, high performance finish with complete WOW factor.

Project

Australian Federal Police Building

Location

5-7 Lobella Circuit - Brisbane Airport, QLD

Builder

Matrix

Product

Caprice Series® / Bentley Series® / Delta Series®

Architect

Cottee Parker

Brief

This state-of-the-art building features louvre cladding [The Delta Series®] as well as vertical feature fins [The Caprice Series®] coupled with horizontal sun-shading elements. [The Delta Series®]

This included design, engineering, manufacture and installation of Caprice series® 634mm and 934mm vertical sunblades. Louvreclad supplied all structural support brackets and end caps.

- Tapered and mitred cuts as detailed
- All necessary structural fixings as required for installation

Louvreclad's comprehensive range of sunhood and screening systems integrate every requirement from standard louvres to eye catching designer fins. The AFP office building at Brisbane Airport incorporates them all.

Project
Quest Apartments - Woolloongabba, QLD

Location
130 Logan Road - Woolloongabba, QLD

Builder
Pellicano Builders

Architect
DBI Architecture

Product
Caprice Series®
Barossa Series®
Delta Series®
Sheraton Series®

Finishes
Dulux Duralloy® Olde Pewter powder coated aluminium finish
Dulux Alphatec® Signal Red powder coated aluminium finish
Colorbond® XRW Windspray

Brief
By utilising the clean, straight lines of the Caprice and Sheraton Series® louvres, Louvreclad were able to embellish the building subtly and tastefully.

Louvreclad's Delta Series® provided the perfect ventilation and privacy screening for the rooftop plant room. The use of bright designer colours added to the aesthetics of the apartments.

Our extensive range of louvres and screens means your entire project needs are met with streamlined systems from design through to installation.

Project

Redcliffe GP Super Clinic

Location

102 Anzac Avenue - Redcliffe, QLD

Builder

Constructions Group

Architect

Mode Design

Product

Merlin Series®

Mirage Series®

Polaris Series®

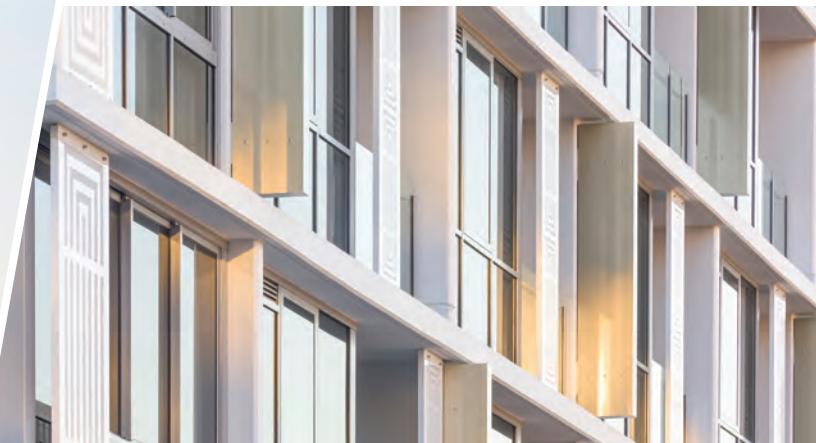

Vitrabond®

Brief

Multiple Louvreclad products were used within this project to achieve the overall effect the client required.

This also included motorised, vertical louvres from the Merlin Series® which enables state-of-the-art sensors that follow the location of the sun.

This provides optimum sun-shading and energy efficiency throughout the day.

**Project**

Alex Perry Apartments

Location

959-965 Ann St, Fortitude Valley QLD

Builder

XEDE Property Management Services

Architect

Cottee Parker

Product

Caprice Series®
Polaris Series®
Varsity Series®
Kensington Series®

Finishes

Dulux Duratec X15® Zeus White powdercoated aluminium
Dulux Duratec X15® Zeus Black powdercoated aluminium

Brief

Spanning 143 stunning designer apartments, this 11 storey building sets a new standard in Apartment living.

With an emphasis on design, the Alex Perry Apartments used a range of Screens to create the perfection you see now.

Cottee Parker incorporated the Louvreclad series into their specifications, providing a stunning solution to the exterior of the building.

Project

Energex - Kelvin Grove

Location

133 Kelvin Grove Road - Kelvin Grove, QLD

Builder

Kane Constructions

Architect

AECOM

Product

Polaris Series®

Hudson Series®

Delta Series®

Venus Series®

Harrier Series®

Brief

Being a Government Owned Corporation, cost-efficiencies and reliability are at the core of Energex's operations.

Louvreclad developed a solution that was more cost-effective than alternatives due to it being lighter and easier to install while still providing vermin proofing. The solution was consequently approved for use by Energex and the result is amazing.

Five different types of louvres and screens were used with multiple specialised colours and styles to achieve a customised, practical and cost effective design.

Project

Riverlink Shopping Centre

Location

Cnr The Terrace & Downs Street - North Ipswich, QLD

Builder

Leda Constructions

Architect

The Buchan Group

Product

Hudson Series®
Nexus Series®
Oxford Series®
Windsor Series®

Finishes

Dulux Duralloy® Deep Ocean powder coated aluminium
Interpon Ultriva® Anodic Natural Matt powder coated aluminium

Brief

A combination of multi-coloured louvres and sun screens were used to 'dress-up and theme' this building overlooking the Bremer River. Louvreclad was able to upgrade the solution to its high-quality Windsor Series® without extra cost to the client.

Louvreclad also used the Hudson, Nexus and Oxford Series® louvres and screens to maximise screening requirements and provide the complete turn key package.

The beauty of the Windsor Series® louvres lies in its excellent spanning capabilities, making it ideal for building refurbishments.

Project

Urbanest Student Village

Location

60 Tribune Street - South Brisbane, QLD

Builder

John Holland Group

Architect

Cox Rayner

Product

Caprice Series®

Sierra Series®

Brief

For the Urbaneast Student Village project, Louvreclad supplied and installed 333 sunhoods as well as nearly 500 m² of louvres.

These sunhoods and louvres provide a modern and contemporary look on one of the city's largest residential buildings.

Louvreclad worked alongside the designer to select the right colours and right finishes for maximum impact. Every aspect of our custom projects is crucial for a positive outcome.

Project

Pimpama Junction Retail

Location

Cnr Yawalpah Road & Dixon Drive -
Pimpama, QLD

Builder

Hutchinson Builders

Architect

TRG Architects

Product

Caprice Series®
Hudson Series®
Varsity Series®

Finishes

Dulux® Moss Green powder coated aluminium finish
Dulux® Kikuyu powder coated aluminium finish
Dulux® Lime Green powder coated aluminium finish
Dulux® Glacier powder coated aluminium finish
Colorbond® XRW Surfmist

Brief

The vertical blade feature screens give off a fresh and vibrant look and add a touch of excitement to an otherwise modest building.

Four different green colours and angled blade pattern were used to exhibit the architect's striking design. Louvreclad also supplied and installed acoustic and plant room louvres to the roof.

Always Ahead

We seek out advanced technology, revolutionary design and the most cost-effective solutions.

Inspiring Style

From simple sophistication to trailblazing trends, our products exude a distinctive style

Bespoke Solutions and Customised Manufacturing

Realise your vision with our design, technical and manufacturing capability

Clever Benefits for Standout Buildings

We back great looks with practical features

Real Confidence

We let the results speak for themselves, continually setting new benchmarks.

Flexibility and Partnership

We have the flexibility and resources to match your project size, timeline and budget.

Quality, Compliance and Peace of Mind

Our business is built on engineering excellence to meet Australian Standards, backed by ISO9901, ISO14001 and AS4801 certification and comprehensive warranties.

A Green Outlook

We boost energy efficiency and help enhance a building's green star rating.
