

Standout Projects NSW

At Louvreclad, we help create remarkable buildings & infrastructure through leading external architectural products and systems and, close collaboration with building owners, specifiers, subcontractors & builders.

Attention to Detail

Quality Assurance systems provides assurance that every project step is meticulously followed to ensure the best outcome every time. This includes but is not limited to:

- Project evaluation
- Estimates prepared
- Proposal submitted
- Tender evaluation
- Pre-award negotiations
- Contract awarded and reviewed
- Preliminary Drawings
- Planning and Purchasing Procurement
- Site measures
- Shop drawings
- Final Approval
- Manufacture and Assembly
- Coatings and packaging
- Delivery and installation
- Warranties and Maintenance schedules

Custom Designs

Louvreclad's custom built designs incorporate your ideas and vision and turn them into practicality. 80% of Louvreclad's projects are unique to each of our clients and are therefore engineered, manufactured and installed specifically for the project. Our mission is to provide exteriors of excellence, with architectural style and functionality.

Louvres

Louvreclad's complete range of fixed and operable louvre systems integrate the inside and out and can add a unique architectural dimension to a building's exterior.

They can be designed to be fully responsive to external conditions, to maximise airflow, provide added weather protection, reduce noise transmission and offer high security.

Screens

Louvreclad's range of architectural screens are versatile in look and nature. Our range of sunscreens, privacy and panel screens control sunlight, heat load and glare; provide extra security; offer protection from the sun, wind and rain and also reduce noise.

“With over 25 years’ experience in the building industry, we guarantee high-quality louvres and screens, efficient project turnaround and professional and helpful support”

The Residence, Hyde Park, Sydney

Products and Solutions

Ingenious solutions combine standout style with clever functionality.

Our louvres and screens can be made fully customised or supplied ready-made – although they can never be labelled ‘off the shelf’ due to their innate quality.

From bespoke solutions to ready-made products, each product delivers something ‘extra’ through its multi-purpose nature:

- Shade and light control
- Privacy and security
- Energy efficiencies
- Maximum natural air flow and ventilation
- Weather protection from water and debris during rain, wind and storms
- Noise reduction
- Vision from inside and out as required.

Our solutions:

- Are versatile with manual and automated control options, many adjustable for conditions.
- Perfectly match the structure and use via the best materials, span, size, strength and fixing method.
- Reflect the latest design trends.

Our Valued Specifiers and Clients

Louvreclad work alongside leading architects, designers and engineers to deliver your vision from initial concept through to completion.

We work with nationally renown developers, builders and sub-contractors who meet our stringent quality standards and strive to perform to the same high standards and values as ours.

Mirage Series®

Project

Summit Apartments

Location

Brodie Spark Drive, Wooli Creek

Builder

Hutchinson Builders

Architect

Scott Carver

Finishes

Powdercoat Sand
Powdercoat APO Grey

Brief

Showcasing a 22 story tower with over 200 apartments and valued at \$58M, Summit provides distinctive designer living at its best, right in the heart of Discovery Point.

Louvreclad worked alongside Hutchison Builders to provide a full turnkey solution for the design, manufacture and installation of high quality vertical screens, custom air conditioning enclosures and sliding screens for Summit Apartments.

This also included custom designed balcony screens which were incorporated for maximum privacy and style.

“Vertical Screens provided aesthetics, privacy and style”

The varying colour palette acts as a counterpoint to existing buildings in the area and enhances the vertical proportions of the building.

“Built on leadership, trust and a passion for excellence, Louvreclad values the long-term relationships we have with our customers”

Dulux Electro

Brief

Louvreclad designed, engineered and installed a complete turnkey package for Union Balmain Apartments.

“allowing unit balconies to have full open view and sunlight or partial privacy”

This included Sliding and bi-folding screens in the Polaris Series, allowing unit balconies to have full open view and sunlight or partial privacy and shade from the afternoon sun and heat.

Vertical louvre screens, Pergola Louvres, Lobby screens and bespoke designed screens were also included for enhanced looks and ventilation. A fantastic result with stunning architectural appeal.

Finishes

Dulux Powder coating - White

Brief

Louvreclad used the Windsor Series® operable screens to create the streamlined effect which the client required for the Oakford Apartments.

“The 90mm blade ensures maximum blockout when shut & maximum airflow when open”

Street appeal was essential as the louvre banks run horizontally to the front pavement increasing their need for something long lasting, class and high impact resistance.

Crisp white makes a nice contrast to the brickwork and overall apartment presentation.

The 90mm Windsor Series® blade ensures maximum blockout rain protection when shut and maximum airflow when open. An easy to use operable system

Brief

Original. Stylish. Cutting-edge design. ADVANXeast is inspirational living.

“It needed to fit the architects design principles and be custom fitted”

Jackson Architecture needed a fixed pergola design for the top story of Advanx East Apartments. It needed to fit the architects design principles and be custom fitted to different angles and sizes - a small challenge.

Louvreclad worked alongside the architect and builder to supply and install the Oxford Series®. A high quality, long lasting option which is ideal for architectural aesthetics due to its robust construction and streamlined design.

Oxford Series®

Project

The Ponds Shopping Centre

- Intensity Sunshine, Gloss 9002084G
- Intensity Moonlight, Satin 9002004S
- Intensity Desert, Satin 900422S7
- Zeus Charcoal 90087732

Brief

Designed to stand out from the crowd in the upmarket suburb of The Ponds, Shopping Centre certainly achieved its aim.

Louvreclad's comprehensive range of louvres & screens provided discreet louvres for roof air-conditioners and the bold façades along the front of the shopping centre. All the screening and louvre requirements were covered in this stunning project.

The architect was also able to design something eye-catching and dynamic with a unique concept from our custom blades. Louvreclad can custom fold a large range of shapes.

The bright colours from the Dulux range provided the architect with the concept for the facade achieving a stunning display of bright, bold colours.

Thank you for your efforts in getting this job across the line, the louvres look fantastic! - PM

“By thinking outside the square, we add stunning individual touches that make a crucial difference to building’s overall appeal, comfort, efficiency, safety and performance”

Barossa Series®

Nexus Series®

Custom Fabric Shade

Brief

The state-of-the-art Paling Court facility consists of 130 suites designed for all levels of quality care in a home-like environment.

“a unique finish of circular gold balustrading, provided an eye-catching finish”

Louvreclad provided Paling Court with the entire package from start to finish including the design, manufacture and installation of all shading, screening and louvre requirements.

Custom built fabric sunshades make an attractive entry into the facility and a bespoke circular gold balustrading, provided an eye-catching finish to the building
Nexus Series® Louvres were used on the lower levels to provide privacy and protection to plant rooms.
Overall, a fantastic project.

“As a reliable and respected project partner, we’re often preferred because of our turnkey solutions and the contribution we make to a building’s energy efficiency, safety and comfort”

Eternity Chain Pearl, 2EUS Luna Eclipse

Brief

An economical solution for a modern looking carpark façade had a surprisingly stunning result.

Vertical Screens for the carpark were designed for balustrading combined with a facade whilst also incorporating the Polaris Series® perforated screening into the project for maximum impact and long lasting privacy screening for the patrons.

“Vertical Screens for the carpark were designed for high and low level cover”

A cost effective design which is ideal for refurbishments to both buildings and car parks alike.

Louvreclad offer a complete suite of sizes in the Barossa Series to suit every application. Enquire today for designs and colour palates to match your application.

UNSW Student Accommodation

Location

High St, Kensington, NSW

Builder

Watpac

Architect

Architectus

Finishes

Dulux Duratec - Eternity Charcoal Pearl

Dulux Duratec - Dune

Clear Anodised Aluminium

Brief

The University of New South Wales Student Accommodation Project, located on the Kensington Campus, is designed to withstand the robust lifestyle of students while adding 'green' elements to the design.

UNSW was designed with extreme precision and the latest in innovation. Each level incorporates cross flow ventilation from the Kensington Series® to ensure natural cooling benefits for every room.

“designed to withstand the robust lifestyle of students while offering ‘green’ elements”

Louvreclad designed, manufactured and installed the louvres, and sunhoods that covered the glass, providing heating protection to ensure the building is kept at optimum performance throughout the day.

Added to the requirements was excellent vision and trafficable awnings .

Always Ahead

We seek out advanced technology, revolutionary design and the most cost-effective solutions.

Inspiring Style

From simple sophistication to trailblazing trends, our products exude a distinctive style

Bespoke Solutions and Customised Manufacturing

Realise your vision with our design, technical and manufacturing capability

Clever Benefits for Standout Buildings
