

Glacier Series® Operable Glass Louvres

Louvreclad Glacier Series® operable louvres offer customisable airflow and rain defence with electric or manual operation. High-quality aluminium design ensures control, comfort, and energy efficiency. Ideal for sports halls, gyms, and warehouses.

Features

PERFORMANCE

Customisable Airflow & Rain Defence

Operable louvres provide 83% free open area when fully open. Electric or manual operation allows precise control over airflow and rain defence.

AESTHETICS

Versatile Blade Options

High-quality aluminium design with various cladding options, including glass, polycarbonate, and metal, to meet thermal, acoustic, and visual requirements. Suitable for commercial finishes.

DESIGN

Optimal Comfort & Efficiency

Customisable pitch and opening angles connected to BMS and weather sensors. Ideal for sports halls, gyms, and warehouses, ensuring energy efficiency and comfort.

Specifications

ORIENTATION

Horizontal

OPERATION

Electric motor/manual winder/pneumatic motor/other

MATERIAL

Extruded Aluminium, Glass or custom substrate to suit performance requirements

FINISH

Powder coat or anodised

ACCESSORIES

Automated Control

INSTALLATION

Installation and mounting details will be designed in accordance with proprietary systems and recommendations as designed and manufactured by Louvreclad.

ORIENTATION

Technical Data Disclaimer

- Indicative maximum span provided are based on generic permissible design wind pressure of 2kPa.
- Span values and product technical information provided are subjected to variance by project specific requirements & influence factors such building location, terrain category & local pressure effects.
- Span values provided are based on typical scenario where product specified are fixed at one end; simply supported at the other end and in either horizontal or vertical orientation.
- If the product specified is required to function as barrier for fall protection or as trafficable element, maximum span and pitch nominated may be reduced.
- Spans values provided could be influenced and reduced when used in dynamically sensitive wind environment.

For project specific product selection or preliminary design & engineering consultation, please contact 1300 165 678 or sales@louvreclad.com to arrange or book a meeting.

Test 4203A

Test Specimen:

**Glacier Series
Glass Blade Operable Louvre**

(6.38 mm thick laminated glass - closed configuration)

Australian Standards:

Measured according to AS 1191-2002

Test Specimen Dimensions:

1800 mm (H) x 1200 mm (W) x 45 mm (D)

Test Location:

Twin Reverberation Rooms
National Acoustic Laboratories
126 Greville Street, Chatswood NSW

Instrumentation:

- Brüel and Kjær Two Channel Pulse Analyser (assembly 2825, 7521, 2 x 3015)
- Brüel and Kjær Cathode Follower type 2639
- Brüel and Kjær Cathode Follower type 2669
- Brüel and Kjær Microphone type 4144
- Brüel and Kjær Microphone type 4179
- Brüel and Kjær Sound Level Calibrator type 4231
- Yamaha Professional Sound Sources type S50

Inspire with Quality

As leaders in the building envelope market, we are known for exceptional quality and lasting value. Our credibility, wealth of knowledge, and unmatched competence enable us to inspire exterior solutions that look good and perform better.

The MadeRight Guarantee

Following our proven process enables us to develop solutions we're proud to put our mark of quality to. We guarantee that all projects will be delivered in a timely manner, be on specification, engineered to Australian standards and finished to the highest quality.

Made to Perform

Louvreclad solutions are made to last and manufactured on-site using high-quality Australian aluminium and steel. As an organisation we are driven to get a thousand things right everyday to achieve our vision to be the face of Australian Building. Our facades are not here to be average, they are here to perform – and so are we.

Speak to an expert

Reach out today to discuss your facade solution requirements; we would love to hear from you.
